

## HEADREST LOCK ASSEMBLY SYSTEM

The system mounts the service lock on headrests in vehicle seats. All individual parts are placed manually on the workpiece carrier and cycled through the assembly and testing stations using a rotary table.

### ■ REQUIREMENTS

- Handling and mounting the wire spring element
- Function query by measuring light barrier

### ■ PROCESS

- Querying all individual parts
- Assembly with process monitoring
- Function testing
- OK/NOK withdrawal

### ■ MACHINE DATA

Place of manufacture: Unimatic Germany

Industry: Automotive

Operating location: Czech Republic

Year of construction: 2023
